

DIVERSITY

Living & Non-Living Things

THINGS AROUND US

Things around us have different **shapes**, **sizes** and **colours**.

This variety of things is called **DIVERSITY**.

Living Things

Living things are things which are alive.

1. Animal

Dog

Cat

2. Plant

Fern

Rose

3. Fungi

Mushroom

Yeast

4. Bacteria

Salmonella

Non-Living Things

Non-living things are things that are not alive.

1. Once Alive

Some non-living things are made from living things that were once alive.
Eg. Plants or animals.

Examples of Once alive

Wood

Leather

Wool

Chair

2. Never Alive

Some non-living things come from the earth. Eg. Metal ores or are man-made like plastic

Examples of Never alive

Glass

Metal

Plastic

Car

Pail & Shovel

LIVING THINGS

Animal

Animals **DO NOT MAKE** their own food and they need **air, food & water**.

Herbivores

ONLY feed on plants

Horse, Sheep, rabbit

Carnivores

ONLY feed on other animals

Tiger, Lion, Eagle

Omnivores

Feed on **BOTH** animals and plants

Chicken, Pig, Dog

Plant

Plants make their own food in the presence of **sunlight, carbon dioxide** and **water**.

They can **MAKE** their own food because plants have chlorophyll.

Lettuce, Tomato, Long Beans, Hibiscus, Sunflower

Fungi

Fungi break down food, thus causing things to decay and they **CANNOT MAKE** their own food.

Feeds on other living things, both dead and alive.

Mushroom, Toadstool, Mould

Bacteria

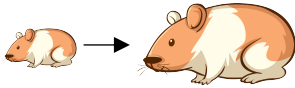

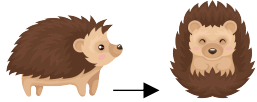

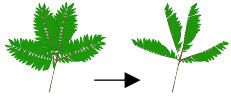

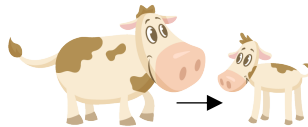

Bacteria are tiny living things called **micro-organisms** as they can only be seen Using a microscope. They **DO NOT MAKE** their own food.

Feed on other living things, both dead and alive.

Salmonella, Lactobacillus

CHARACTERISTICS	LIVING THINGS	NON-LIVING THINGS
Need Water, Air & Food	Need Water, Air & Food	Do not need Water, Air & Food
Die	Living things die	Do not die
Move by Themselves	 <p>Grows towards light</p> <p>Move by themselves</p>  <p>A dog moves to get food</p>	Do not move by themselves
Grow	 <p>The pup grows into a hamster</p> <p>Grow in height, mass or length</p>  <p>A seed grows into a plant</p>	Do not grow
Respond to Changes Around Them	 <p>A hedgehog rolls into a ball</p> <p>Respond to changes around them</p>  <p>A mimosa plant closes its leaves when touched</p>	Do not respond to changes around them
Reproduce	 <p>A cow gives birth to calf</p> <p>Reproduce</p> <p>To ensure that their species does not become extinct and the continuity of their own kind.</p>  <p>A hen lays eggs that hatch into chicks</p>	Do not reproduce
